

Quiz with certainty degrees

Scannable version: answers and student ID are marked on the last page

Instructions

Each question has **four proposed answers** (1 to 4) and **one and only one** correct solution. Two *implicit solutions* apply to **every** question, even though they are not printed under it:

6 *None* : no proposed answer is correct

7 *All* : all four proposed answers are correct

For **each** question, mark on the answer sheet one answer (1, 2, 3, 4, 6 or 7) **and** one certainty degree (DC). If you change your mind, use the **second line** of that question: it replaces the first one.

DC	Probability of being correct	If correct	If wrong
0	0 – 25 %	+13	+4
1	25 – 50 %	+16	+3
2	50 – 70 %	+17	+2
3	70 – 85 %	+18	0
4	85 – 95 %	+19	–6
